

Thiel College

Greenville, Pennsylvania

Now is an Exciting Time at THIEL COLLEGE in Greenville, Pa.

The College has five new and innovative graduate degree programs. Classes in the new physician assistant studies program and communication and leadership began this summer, while the M.B.A. and speech-language pathology programs celebrated their inaugural classes in 2021. The College is enrolling students in its new Master of Arts in Clinical Mental Health Counseling program which will begin this summer.

“In the last five years, we’ve moved into graduate education. We offer graduate degrees that are in high demand,” President Susan Traverso, Ph.D. said. “We were very intentional in developing our graduate programs in partnership with future employers so that we are fostering relationships and nurturing the workforce that is needed in all of western Pennsylvania.”

Thiel College graduate programs:

- Business Administration
- Clinical Mental Health Counseling
- Communication and Leadership
- Physician Assistant Studies
- Speech-Language Pathology

Personalized Attention

If you are looking for personalized attention, flexibility and a head start in your field or professional career, then you should consider a Thiel College graduate degree. Accelerated degree programs in business and speech-language pathology make it possible to earn a degree in about a year. The Thiel College community provides the support of academic, career and financial aid counseling to help you reach your goal.

“Coming from a big university, I did not experience the closeness with my teachers and was overwhelmed with the size. As such, I believe attending a smaller college like Thiel College would allow me to integrate with the program and build relationships with my peers and staff,” said Gemima Muteba G’22, a University of Maryland graduate and physician assistant studies student. “That’s why I chose Thiel. I’m thrilled by the staff who are passionate about their students and the amount of professional support we’re able to get here at Thiel. I feel like I can reach out for help whenever I need something and know that someone will be there to lend their support.”

Welcoming Community

All of Thiel College’s graduate programs have pathways for students who did not get their Bachelor’s degree at the College. The Management M.B.A. and Communication and Leadership programs have been designed to continue the momentum of recently graduated Bachelor’s degree students. The year-long programs have an accelerated, cohort-based, experiential and residential learning environment. Specific experiential learning experiences will be required of all students in settings that extend the learning environment beyond the classroom.

“The thing that really appealed to me was the community feel of the campus. It’s a productive program, and it’s everything I thought it would be and more. When I saw how it was going to be a dynamic work environment, and the wide range of students they were pulling in, it interested me,” said Alex Hudson G’21, an M.B.A. graduate from Hermitage, Pa. “We have students from completely different industries and markets, and we all have different experiences. We have students who’ve come straight out of undergrad into the graduate program. So it’s a nice mix of knowledge which leads to good discussions. There’s a lot of real experiences we talk about. It’s a great program.”

New Facilities Support New Programs

A recently completed \$3.5 million project on campus created a floor of dedicated lab, office and classroom space for the College’s physician assistant and speech-language pathology students. It was the first phase of a \$16 million project that is going to include more class and lab space as well as major improvements to the College’s Academic Center and athletic and health and wellness facilities. Master of Science in Speech-Language Pathology and Master of Science in Physician Assistant Studies program students work and study in state-of-the-art facilities. Speech language students gain clinical hours in the Thiel College Center for Speech-Language Services and while physician assistant students are working in the brand new Human Anatomy (cadaver) lab. The students will study in a patient-centered environment that promotes critical thinking and medical problem-solving skills. Founded in 1866 as a coeducational institution in western Pennsylvania, Thiel College is home to a diverse student population, small class sizes and committed faculty. The campus is near bike and hiking trails, state and local parks, and outdoor amenities.
