

Chatham University

Pittsburgh, Pennsylvania

Chatham offers master's and doctoral degrees in a wide array of subjects in our areas of excellence: health & sustainability, business & technology, the arts & sciences.

One of the earliest schools of its kind in the country, the Falk School of Sustainability & Environment (FSSE) is a wellspring for leadership and education to overcome current and future sustainability challenges. FSSE offers master's degrees in food studies, sustainability and dual-degree programs that blend food studies or sustainability with an MBA. **Graduates have gone on to work for organizations including the Pittsburgh mayor's office, San Francisco Food Systems, H.J. Heinz Corp., Idea Foundry, Evoqua, GTECH and Hertz.**

The highly collaborative School of Health Sciences (SHS) at Chatham stands in stark contrast to the "lost in the crowd" health sciences programs at many larger universities. The school's unique makeup allows for interprofessional education among students in physician assistant studies, psychology, physical therapy, occupational therapy, healthcare informatics, nursing and athletic training. **Graduates work in a wide range of healthcare settings, such as UPMC, Allegheny General Hospital, Princeton University Medical Center, Kaiser Permanente, The Children's Institute and the University of Pittsburgh Cancer Institute.**

Students come to the School of Arts, Science & Business (SASB) because our programs blend small class sizes with entry into vibrant communities and networks throughout Pittsburgh and across the country. SASB offers advanced degrees in business, communication, science, design, education, creative writing and more. **Graduates work at organizations including BNY Mellon, H.J. Heinz Corp., Radio Free Asia, Dollar Bank, DuPont Corp., Pittsburgh Pirates, the Andy Warhol Museum and MAGNET Global Network.**
